

S-BOX™

MINI – TR 15a

2-Port “Pop-up” Receptacle Unit for Countertops and Interior Design

2 x Tamper Resistant outlets and safety switch

NEC 406.5(E) compliant
FULLY SPLASH-TESTED AND APPROVED
FOR USE IN WET LOCATIONS

UL943A 2 litre (½ Gallon)
Saline Liquid Test

The S-Box™ Mini-TR unit is beautifully simple, but is also small and robust. It is constructed from solid steel, is easy to install, and is built to perform in the toughest of kitchen environments. Its **instant** “pop-up” action delivers two tamper-resistant power outlets **and** a reachable on/off switch at the simple touch of a finger.

For that ultimate ‘designer touch’ it gets even better! . . . because the S-Box™ patented design also includes the built-in ability to *customise* the unit’s top with a piece of matching counter material . . . and still be able to lift automatically!

The S-Box™ system is therefore the only pop-up countertop system that can be disguised into its surroundings. A true ‘chameleon’ product . . . where the possibilities are endless!

Fully inset

Surface mounted with simple top change

Independently tested by FIRA (Furniture Industry Research Association) to 75,000 sequential operations. At 4 x uses per day that’s over 50 years!

WAYS OF FITTING YOUR S-BOX

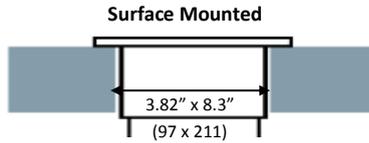

With or without custom top

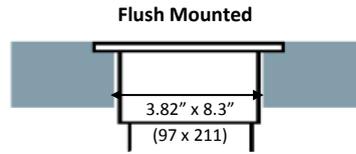

With or without custom top

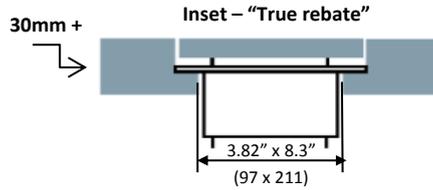

The S-Box mounting collar is adjustable to accommodate up to 1/2" (12mm) material

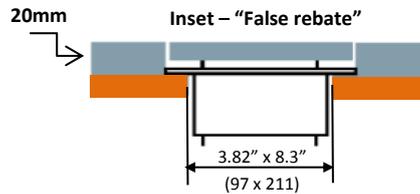

Please note:
IN ALL METHODS INVOLVING A CUSTOM TOP, THE S.S. ONE MUST BE REMOVED FIRST.
THE MAXIMUM THICKNESS OF ANY CUSTOM TOP IS 12.5mm (0.5")

Surface Mounted in shallow 2.5mm rebate for a 'flush' finish

Set on 8mm wide rebate at 20mm below surface.

Set on 'false' rebate - created by use of a second material below the 20mm one.

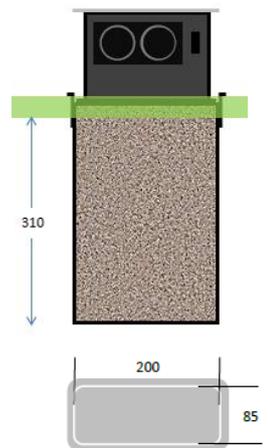

NOTE: ANY 'BELOW-SURFACE' INSTALLATION MUST BE AT -20mm

WE RECOMMEND THAT 'CUT-OUT' PROCESS AND/OR ANY ALTERNATIVE 'CUSTOM TOP' SHOULD BE DONE BY YOUR COUNTERTOP PROVIDER

THIS UNIT IS A 15A DEVICE. IT IS A SUPPLEMENTARY POWER FACILITY. IT MAY BE CONNECTED TO EITHER A 20 AMP CIRCUIT OR A 15AMP CIRCUIT FOR ITS SUPPLY, BUT IT WILL ONLY DRAW 15A IN EITHER EVENT. IT IS FULLY PRE-WIRED AND READY-TO-GO, AND INCLUDES ITS OWN CABLE TAIL AND PLUG.

AS REQUIRED BY NEC and U.L. STANDARDS IT SHOULD BE FITTED DIRECTY INTO A GFCI RECEPTACLE or ALTERNATIVELY HARDWIRED INTO A GFCI CIRCUIT

At last! There is a 'designer' solution for countertop power!

Just fit it your way!
