

S-BOXTM
CHAMELEON

**HIDDEN POP-UP SOCKETS
FOR INTERIOR DESIGN**

POP-UP POWER WITH THE INVISIBLE TOUCH

The S-Box® Chameleon range of invisible “pop-up” sockets is very special. Its patented lift-action delivers its valuable payload instantly and smoothly at the simple touch of a finger (**with no electrics, no springs, no gas struts**) but has been cleverly designed to use almost any material as its top.

It is at last now possible for Designers to provide countertop power that is camouflaged in its surroundings . . . until required.

S-Box™ products are not like plastic towers of the past, they are tough, stylish and discreet, and are **built from solid steel**.

Independently tested by FIRA
(Furniture Industry Research Association)
for over 75,000 continuous operations.

S-BOX™

**IN NATURE CAMOUFLAGE IS A MATTER OF SURVIVAL
. . IN DESIGN, IT'S A MATTER OF STYLE!**

S-Box® chameleon pop-up sockets are available in a range of International plug types and are used by Designers in over 60 Countries around the world.

The S-Box™ socket design has passed the very latest countertop spill and splash tests for use in Wet Areas so they are a **safe and stylish solution** for providing convenient power in any work-surface or kitchen island.

S-Box® Chameleon uses a piece of **your** work-top material to create a camouflaged installation.

The clever lift-action still pops-up smoothly, whatever density of material is being used!

.. NO ELECTRICS
.. NO SPRINGS
.. NO GAS STRUTS

An Eco friendly zero-energy lift system that *adjusts* for different weight!

This is the engineering break-through that designers have been waiting for. An adaptable 'lift-system' for **any** material - lightweight timber or heavy-weight stone!

It is now possible to provide convenient pop-up countertop power, without spoiling the clean lines of design, or the beauty of a surface finish.

S-Box® socket units are available in two sizes, offering either 2 or 3 ports. They are manufactured as complete sealed units with a 2.5m cable tail for connection to mains power by qualified electrician. This cable can also receive a plug if preferred.

2-PORT (MINI)

3-PORT

Units are available with any of the following international sockets fitted:

TYPE G
BS

TYPE F
EURO

TYPE E
FR/BE
PL/CZ

TYPE L
IT

TYPE J
CH

TYPE B
US
120v

TYPE I
AU/NZ (3-port
unit only)

+ In position A of the 3-port model
other optional modules can be
pre-fitted **instead** of sockets

USB 3A
240 v only
= Not US/CAN or AU

RJ45
(Including connection tail)

HDMI

For **domestic use in USA & Canada**
S-Box™ units are **only** supplied as MINI TR
models **with Tamper-Resistant receptacles**
– as required by NEC regulations.

These are available in 15A or 20A models

15A unit is a silver receptacle

20A unit is a black receptacle

2006/96/EC
2004/108/EC
CE

S-Box® chameleon is suitable for *all* interior design

And allows imagination to run

S-BOX™

S-Box® Chameleon sockets are supremely adaptable.

They provide Designers with the *ultimate* facility - to use any surface material they wish to deploy - at the same time as providing convenient supplemental power in a truly stylish way. The art of camouflage is now their disposal.

S-Box® Chameleon sockets are suitable for Domestic and Commercial use in:

Kitchen Islands, Office and Boardroom Furniture, Hotels, Retail Design & Store-fitting, Laboratory, Medical & Education facilities, in fact anywhere that requires disguised power presented properly, using dead space or voids within furniture.

The S-Box™ Patent includes the vital inventive step required to offset the use of almost any custom top material - and its different weight - without affecting its "lift", and **without the use of power**. No gas-strut or spring has ever been devised that can do this!

ZERO ENERGY
INSTANT LIFT

www.the-sbox.com

S-Box® Chameleon units are supplied with a flexible **two-part collar design**.

This allows for the different corner radius of machine-cutting tools and the final design appearance of any installation.

The **Part 1** *pre-fitted* black collar has “no-radius” corners to permit very small radius or even zero-radius cutting in particular. This can be used just as it is.

The **Part 2** stainless steel cover plate can be placed over this collar to provide an enhanced and fully-filled corner of a rounded rebate if desired.

The radius corners of this cover plate accommodate a 10mm radius or more

PART 1 COLLAR ONLY

PART 1 COLLAR + PART 2 COVER

PART 1 COLLAR

PART 2 STAINLESS STEEL COVER

PART 1 + PART 2 COVER

PART 1 COLLAR ONLY

PART 1 COLLAR + PART 2 COVER

S-BOX® CHAMELEON MODELS are supplied **without a top**, and are designed to drop into a pre-cut hole in the Counter **on a rebate at exactly 20mm below the surface** i.e. a 'shelf' of material.

They are duly ready to receive their own matching piece of worktop (up to 12mm maximum thickness) to be used as the custom top.

CUTTING OF STONE MATERIALS SUCH AS GRANITE & QUARTZ IS A **FACTORY PROCESS** SO PLEASE INVOLVE THE FABRICATOR OF SUCH MATERIALS IN THE DESIGN & SPECIFICATION PROCESS

Router-tool follows instruction

Router-tool above material

Slicing off-cut for custom top

Router-tool cutting the hole

This rebate is either a **"True"** one that is pre-cut by a router **within thick material (30mm and over)**

or it is a **"False"** rebate. This is one that is *created* directly below thinner material (20mm or less) by using a **secondary material bonded underneath** to 'create' the shelf.

<< 5-6 mm clearance for 'press down' action

FULL INSTRUCTIONS, DATA SHEETS, CAD FILES AND CUTTING DIMENSIONS FOR ALL INSTALLATIONS ARE LOCATED AT: ► <https://www.the-sbox.com/tech-data/>

S-BOX
SURFACE

IN MATT BLACK or STAINLESS STEEL

S-Box™ units are also available in a Surface-Fit form, complete and ready-to-go, for a simple "drop-in" to a hole in the worktop. These are supplied with their own surface-mounting collar and a matching solid steel top.

These universal units offer the same "pop-up" action, and deliver convenient power outlets from the countertop in a choice of **brushed stainless steel** or **black powder-coated paint** finish to provide a strong and stylish feature.

Their flat design is tough and hot-pan-friendly, and ensures that no work surface space is lost when they are not in use.
