25 Watts of 'clever' power

The new TUF-R® A+C USB charger offers different supply voltages depending on the device being charged.

When a device is plugged in to either Type A or Type C socket a digital 'handshake' takes place allowing the TUF to charge the device at the optimum level.

USB Type C 5 Volts x 3 Amps = 15 Watts
 9 Volts x 2.22 Amps = 20 Watts
 15 volts x 1.65 Amps = 25 Watts
 20 Volts x 1.2 Amps = 24 Watts

USB Type A 5 Volts x 3 Amps = 15 Watts
 9 Volts x 3 Amps = 18 Watts
 12 volts x 1.5 Amps = 18 Watts
