

# S-BOX<sup>TM</sup>

## CHAMELEON

## INTERNATIONAL POP-UP SOCKETS

WITH CAMOUFLAGE SKILLS

**S-Box® Chameleon pop-up sockets are very special.**

Their patented 'instant lift' action delivers power points quickly, and beautifully, by the simple press of a finger, with no motor, no springs, and no gas struts to do so, and are cleverly designed to use the project material as their custom top.

It is, at last, now possible to provide countertop power that is camouflaged in its surroundings . . . until it is actually required!

S-Box™ products are nothing like the plastic towers of the past. They are tough, stylish and discreet, and are built from solid steel.

**IN NATURE, CAMOUFLAGE IS A MATTER OF SURVIVAL  
.. IN DESIGN, IT'S A MATTER OF *STYLE!***

**S-Box® Chameleon pop-up sockets are manufactured in a wide range of International Plug Types and are used by Designers in over 70 Countries around the world.**

The S-Box™ socket box design has passed the ½ gallon Countertop Spill and Splash Tests for use in Wet Areas so it is both a stylish and safe solution for providing convenient power in any work-surface or kitchen island.

- .. NO MOTOR
- .. NO SPRINGS
- .. NO GAS STRUTS

A "zero-energy" lift system that *adjusts* for different weight!

S-Box® Chameleon uses a **10-12mm piece of your work-top material** to create a camouflaged finish, and **sits on a rebate 20mm below surface**.

The patented "press and lift-action" still pops-up automatically

.. whatever density of material is being used for the Top!

This is the engineering break-through that designers have been waiting for! A simple adaptable 'lift-system' for **any** material . . . from lightweight timber through to heavy-weight granite and quartz!

It is now possible to provide convenient countertop power without spoiling the clean lines of any design, or the beauty of a surface finish.

S-Box™ products now feature IDR (Intelligent Device Recognition)

# “NEXT GENERATION” USB TECHNOLOGY

S-BOX™ 2012-2022

## 25 Watts of ‘clever’ power

The TUF-R® A+C USB charger offers different supply voltages depending on the device being charged. This is Intelligent Device Recognition (IDR)

When a device is plugged in to either Type A or Type C socket a digital ‘handshake’ takes place allowing the TUF to charge the device at the optimum level – automatically!

**USB - C** 5 Volts x 3 Amps = 15 Watts  
 9 Volts x 2.22 Amps = 20 Watts  
 15 volts x 1.65 Amps = 25 Watts  
 20 Volts x 1.2 Amps = 24 Watts

**USB - A** 5 Volts x 3 Amps = 15 Watts  
 9 Volts x 3 Amps = 18 Watts  
 12 volts x 1.5 Amps = 18 Watts

## + ‘COMMERCIAL GRADE’ OPTION

WITH ULTRA-HIGH POWER of 72 WATTS!  
 For Laptop/Tablet/MacBook® & Office

Provides: 60W to USB-C  
 12W to USB-A

## 2-PORT MINI

Our smallest and simplest pop-up socket Model.  
Available in either **2 x Plug Sockets only**  
or **1 x Socket + A+C USB 25W**

Code: **CHAM-MINI** + [socket type below](#)

Code: **CHAM-MINI-USB** + [socket type below](#)

**NEW!**

## 3-PORT (3 x Sockets)

Features 3 x Plug sockets and on/off safety switch. Constructed in solid steel.  
Unit is pre-prepared to receive its own custom top (**up to 12mm max**).

Code: **CHAM-01** + [socket type below](#)

## 3-PORT (2 x Sockets + A+C 25W USB)

Comprising 2 x Plug sockets plus A+C USB-TUF® (25W)  
and on/off safety switch. Ready to receive its own  
custom top (**up to 12mm max**).

Code: **CHAM-02** + [socket type below](#)

For Ultra-High-Power  
USB (72W) option

Use Code: **72W**

This is a pre-fitted-only option

# S-BOX™ CHAMELEON - SPECIALIST RANGE

featuring “comms”

RJ45 AND HDMI MODULES ALSO INCLUDE FLOOR CONNECTOR CABLE

# THE WORKTOP - RULES 1 & 2

9

- 1** S-BOX® CHAMELEON MODELS are supplied **without a top**, and are designed to drop into a pre-cut hole in the Counter **on a rebate at exactly 20mm below the surface** i.e. a 'shelf' of material.
- 2** They are duly ready to receive their own matching piece of worktop (up to 12mm maximum thickness) to be used as the custom top.

CUTTING OF STONE MATERIALS SUCH AS GRANITE & QUARTZ IS A **FACTORY PROCESS** SO PLEASE INVOLVE THE FABRICATOR OF SUCH MATERIALS IN THE DESIGN & SPECIFICATION PROCESS

Router-tool follows instruction

Router-tool above material

Slicing off-cut for 12mm Top

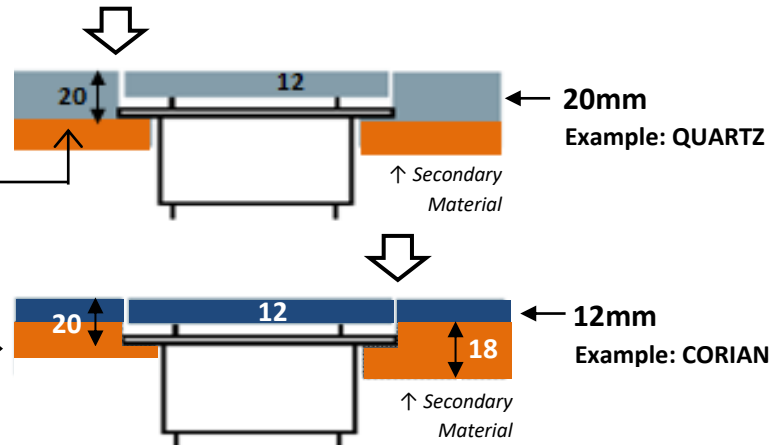

Router-tool cutting the hole

This rebate is either a **"True Rebate"** - e.g. one that is pre-cut by a router **within** thick material (30mm and over)

Example: GRANITE

**OR** it is a **"False rebate"**. This is one that is *created* directly below thinner material (20mm or less) by using a **secondary material bonded underneath** to 'create' the shelf.

Example: QUARTZ

Example: CORIAN

<< 5-6 mm clearance for 'press down' action
