

S-BOX™ IS A GLOBALLY PATENTED POP-UP PRODUCT FOR DELIVERY OF CONVENIENT SOCKETS TO **LOW-POWER DEVICES AND ACCESSORIES\*** IN THE HOME AND OFFICE.

**\*SEE DEVICE LIST  
(on page 2)**

The S-BOX™ 15A Range of products can be connected to **ANY** mains supply circuit of **20 Amperes OR less\*** (i.e.15A) because it has a built-in **current limiter circuit breaker switch**. This uniquely prevents it from any overload above 15A.

(\*as per UL 962A Standards 2022 for Kitchen Countertops)

**Built-in 15A Limiter  
MCB Switch  
(Mini Circuit Breaker)**

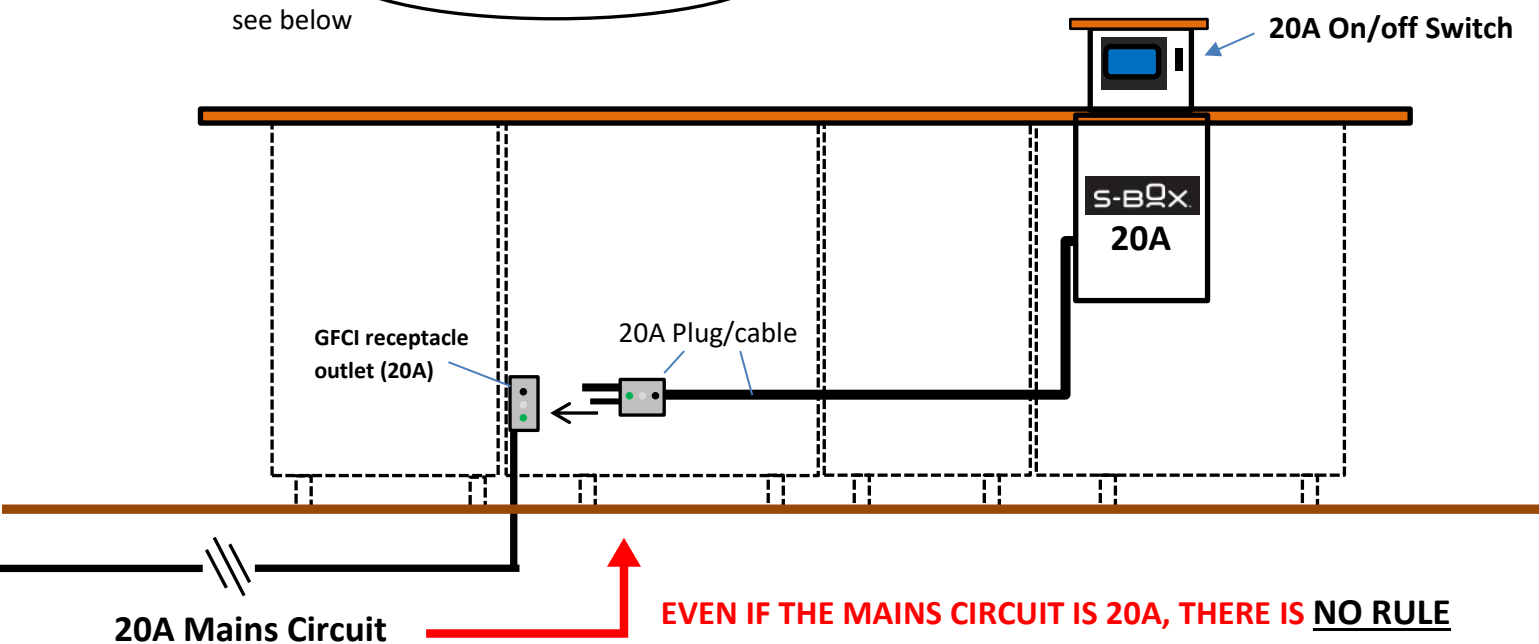

An S-BOX™ 20A Unit *is* still available for connection **only to a 20 Amp mains supply circuit** (even though S-Box™ products are NOT designed as the power outlets for “high power” items). They are principally designed as a convenient “supplementary” outlet for handheld, low power accessories in the kitchen . . . all of which are 15A anyway!

**PLEASE NOTE >** 20A Circuit  $\neq$  20A FPDU !

see below

**EVEN IF THE MAINS CIRCUIT IS 20A, THERE IS NO RULE WHATSOEVER THAT STATES THAT THE POP-UP RECEPTACLES IN AN ISLAND COUNTERTOP SHOULD BE 20A AS WELL!**

Countertop Device – LOW POWER	Supplied with Device (by Manufacturer)
