

S-BOX™ CHAMELEON

INTERNATIONAL POP-UP SOCKETS

WITH CAMOUFLAGE SKILLS

S-Box® Chameleon ‘pop-up’ sockets are very special.

Their patented ‘instant lift’ action delivers power points quickly, and beautifully, by the simple press of a finger, with no motor, no springs, and no gas struts to do so, and are cleverly designed to use the project material as their custom top.

It is, at last, now possible to provide countertop power that is camouflaged in its surroundings . . . until it is actually required!

S-Box™ products are nothing like the plastic towers of the past. They are tough, stylish and discreet, and are built from solid steel.

**IN NATURE, CAMOUFLAGE IS A MATTER OF SURVIVAL
IN DESIGN, IT’S A MATTER OF STYLE!**

S-Box® Chameleon pop-up sockets are manufactured in a wide range of International Plug Types and are used by Designers in over 70 Countries around the world.

The S-Box™ socket box design has passed the ½ gallon Countertop Spill and Splash Tests for use in Wet Areas, so it is both a stylish and safe solution for providing convenient power in any work-surface or kitchen island.

NEC 2.2 litre (½ Gallon) Saline Liquid Spill Test 406.5 (E)

WORLD SOCKET OPTIONS

GB/IRE (Type G)

EURO Schuko (Type F)

FR/BE/CZ/PL (Type E)

ITALY (Type L)

SWITZERLAND (Type J)

Water Jet cutting technology now allows S-Box™ units to be “book-matched” for full Chameleon camouflage.

Cutting by Router will have to be a “best match”. (see page 9)

USA/CANADA (Type B)

INDIA (Type D)

BRAZIL/RSA (Type N)

AU/NZ (Type I)

- .. NO MOTOR
- .. NO SPRINGS
- .. NO GAS STRUTS

A "zero-energy" lift system that *adjusts* for different weight!

S-Box® Chameleon uses a **10-12mm piece of your work-top material** to create a camouflaged finish, and **sits on a rebate 20mm below surface.**

The patented "press and lift-action" still pops-up automatically
 .. whatever density of material is being used for the Top!

This is the engineering break-through that designers have been waiting for!
 A simple adaptable 'lift-system' for **any** material . . . from lightweight timber through to heavy-weight granite and quartz!

It is now possible to provide convenient countertop power without spoiling the clean lines of any design, or the beauty of a surface finish.

S-BOX™ 2012-2024

S-Box™ USB-C modules feature IDR (Intelligent Device Recognition)

“NEXT GENERATION” USB TECHNOLOGY

25 Watts of ‘clever’ power

for Mobile Phones

The TUF-R® A+C USB charger offers different supply voltages depending on the device being charged. This is Intelligent Device Recognition (IDR) – with a TOTAL of 25W available.

When a device is plugged in to either Type A or Type C socket a digital ‘handshake’ takes place allowing the TUF to charge the device at the optimum level – automatically!

USB - C 5 Volts x 3 Amps = 15 Watts
9 Volts x 2.22 Amps = 20 Watts
15 volts x 1.65 Amps = 25 Watts
20 Volts x 1.2 Amps = 24 Watts

USB - A 5 Volts x 3 Amps = 15 Watts
9 Volts x 2 Amps = 18 Watts
12 volts x 1.5 Amps = 18 Watts

or **‘COMMERCIAL GRADE’ OPTION**
WITH ULTRA-HIGH POWER USB of 72 WATTS!
For Laptop/Tablet/MacBook® & Office

Provides: 12W to USB-A
60W to USB-C

THE WORKTOP - RULES 1 & 2

- 1** S-BOX® CHAMELEON MODELS are supplied **without a top**, and are designed to drop into a pre-cut hole in the Counter **on a rebate at exactly 20mm below the surface** i.e. a 'shelf' of material.
- 2** They are duly ready to receive their own matching piece of worktop (up to 12mm maximum thickness) to be used as the custom top.

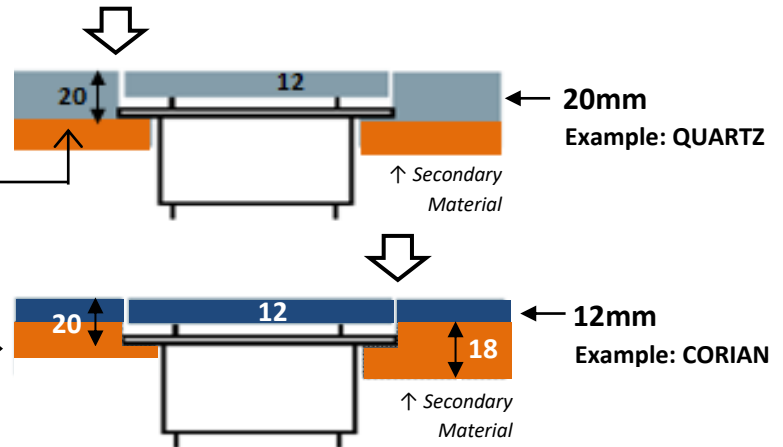

CUTTING OF STONE MATERIALS SUCH AS GRANITE & QUARTZ IS A **FACTORY PROCESS** SO PLEASE INVOLVE THE FABRICATOR OF SUCH MATERIALS IN THE DESIGN & SPECIFICATION PROCESS

This rebate is either a **"True Rebate"** - e.g. one that is pre-cut by a router **within thick material (30mm and over)**

OR it is a **"False rebate"**. This is one that is *created* directly below thinner material (20mm or less) by using a **secondary material bonded underneath** to 'create' the shelf.
